

CLAIMS

What is claimed is:

- 1 1. A toy exercise facility comprising:
2 a convertible carrying case having a top section, bottom section and four
3 sides;
4 said carrying case being openable such that the bottom section, at least
5 four sides and top section lie flat when the carrying case is opened; and
6 a plurality of toy replica circuit training stations attached to the carrying
7 case bottom section, four sides and top section.
- 1 2. The toy exercise facility, according to claim 1, further comprising
2 means to play recorded music when the carrying case is in an opened configuration.
- 1 3. The toy exercise facility, according to claim 2, wherein the
2 recorded music playing means is a removable compact disc player.
- 1 4. The toy exercise facility, according to claim 2, wherein the
2 recorded music playing means is a computer processor.
- 1 5. The toy exercise facility, according to claim 1, wherein the replica
2 circuit training stations include one or more of an treadmill, stationary bike, barbell
3 bench, and sit-up bench.
- 1 6. The toy exercise facility, according to claim 1, wherein the replica
2 circuit training stations include one or more of an elliptical trainer, step benches, and an
3 exercise ball.
- 1 7. The toy exercise facility, according to claim 1, wherein the top
2 section becomes a miniature wall section for the toy exercise facility when the carrying
3 case is in an opened configuration.
- 1 8. The toy exercise facility, according to claim 1, further comprising
2 a removable drawer having a plurality of compartments to hold dolls.

1 9. The toy exercise facility, according to claim 1, wherein the
2 plurality of circuit training stations are made from a pliable plastic material.

1 10. The toy exercise facility, according to claim 1, wherein one or
2 more of the plurality of circuit training stations is removable and reattachable to the
3 carrying case.

1 11. The toy exercise facility, according to claim 10, wherein the
2 plurality of circuit training stations are magnetically attached to the carrying case.

1 12. A miniature circuit exercise room comprising:
2 a convertible carrying case having a top section, bottom section and side
3 sections;

4 connecting means between the bottom section, side sections and top
5 section such that the bottom, side and top sections may be configured to lie essentially
6 flat, as well as being configurable into a carrying case;

7 a handle attached to the carrying case;

8 a plurality of toy replica circuit training stations attached to the carrying
9 case bottom section, four sides and top section; and

10 at least one doll sized to allow a child to pretend said doll is exercising at
11 the replica circuit training stations.

1 13. The miniature circuit exercise room, according to claim 12,
2 wherein the connecting means are a plurality of hinges.

1 14. The miniature circuit exercise room, according to claim 12,
2 wherein the connecting means are a plurality of flexible textile sections.

1 15. The miniature circuit exercise room, according to claim 12, further
2 comprising a removable drawer having a plurality of compartments sized to hold the at
3 least one doll.
